

Model 931-B

In-Line Deflagration Arrester / In-Line Detonation Arrester

BSBflamearrester.com | BSBsystems.com

Visit our website for the most complete, up-to-date information

BS&B FlameSaf® flame arresters embody superior design characteristics and are third-party tested to the latest standards in order to provide state of the art explosion protection. Utilizing the flame arrester elements to extinguish the flame, FlameSaf flame arresters are widely used to protect tanks, piping and other systems against deflagrations and detonations. Consult your local BS&B representative or call us for consultation on your safety concerns.

Features

- In-line deflagration arrester / in-line detonation arrester
- Stable and unstable detonation
- EC prototype test certificate according to ATEX Directive 2014/34/EU and EN ISO 16852:2016
- Available in nom. Diameter: DN6 (1/8") – DN15 (1/2")

Protection

- Gas/air or vapour / air-mixtures for explosion groups up to and including IIC (NEC Group B), MESG < 0.50mm

Connection Type

- Rp to ISO 7-1 (DIN 2999)
- BSP to BS 21
- NPTF to ANSI B1.20.3
- Other types available upon request
